REECE CROWTHER

Web Developer | WordPress & WooCommerce | Performance & Technical SEO

Liverpool, UK | +44 7532 010741 | reececrowther@hotmail.co.uk | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Web Developer with 3+ years' commercial experience delivering high-performance WordPress and WooCommerce websites for agency and direct clients. Specialises in front-end animation (GSAP), site speed optimisation, and technical SEO — work that has improved page speed by up to 40% on client builds. Builds and ships independent full-stack products alongside client work, from concept through to a live, paying-customer SaaS product. Comfortable owning a build end-to-end, from Figma handoff through development, hosting, and post-launch support.

CORE SKILLS

WordPress · WooCommerce · Shopify · JavaScript · React · Next.js · PHP · SQL · HTML5 · CSS/SASS · GSAP · Git · Google Analytics · cPanel · Klaviyo · Figma-to-code · Technical SEO · Site Speed Optimisation

WORK EXPERIENCE

Web Developer — Platform81 *Stockport | Apr 2024 – Present*

- Build responsive, high-performance websites for multiple agency clients, from Figma handoff to deployment
- Implement GSAP animations to enhance engagement without compromising load speed
- Optimise site performance and technical SEO, improving page speed by up to 40% on client builds
- Manage hosting environments and databases, including scaling for traffic and load changes
- Test across browsers and devices, resolving cross-browser compatibility issues
- Collaborate with designers and clients to deliver builds to spec and deadline

Web Developer — Deliver Media *Remote | Aug 2021 – Apr 2024*

- Sole web developer responsible for bespoke WordPress builds from concept to deployment, working directly with clients
- Built WooCommerce eCommerce sites, from product setup through to checkout
- Converted Figma designs into responsive front-end builds
- Improved page speed, technical SEO, and site performance across client sites, supporting increased traffic and conversion rates
- Managed hosting, deployments, and ongoing client environments
- Used Google Analytics to track and report on performance improvements
- Maintained client relationships and delivered ongoing post-launch support

INDEPENDENT PROJECTS

Loadzen — Self-built SaaS website speed checker and optimisation tool. Audits Core Web Vitals, generates prioritised fix plans by platform (WordPress, Shopify, WooCommerce, Magento), and offers competitor comparison and white-label reporting on paid tiers (loadzen.co.uk)

LifeOS — Full-stack task and habit-tracking app with user accounts, a gamified XP/streak system, and a focus-mode dashboard (life-os-app-seven.vercel.app)

Afterglow — UK sunset-quality forecasting app; scores locations 0–100 by combining live cloud, atmosphere, and visibility data via the Open-Meteo API (sunset-pied.vercel.app)

One Port Street — Client WordPress build (oneportst-manchester.com)

Flue Pipes Direct — Client WordPress/WooCommerce build (fluepipesdirect.co.uk)

EDUCATION

BSc Computer Science (Games Development), University of Chester — First Class Honours, 2014–2017

INTERESTS

Hiking, climbing, travel, and sketching.
